### JOHN F. CARROLL QUITS POLITICS.

**Business** Interests Are More Important, and Then He May Lay Foundation for a Social Staircase for His Palace.

HIS HOUSE COST \$600,000.

Is Very Rich, a Banker Now, and Associated in Great Enterprises, So He's Going to Forget Some of

John F. Carroll is out of politics once and for all. He is a millionaire. He has social aspirations. He has built himself a palace for \$600,000 next to the granite pile of the late Collis P. Huntington at No. 8 East Fifty-seventh street. His business interests are enormous. He is a banker, the friend of Charles W. Morse, the owner of the biggest string of banks in the world.

Why should John F. Carroll stay longtime to wipe off the mud that has been burled at him while he was amassing the great fortune that is now his. His aspiration to take the chair of Richard absolute despot has been defeated. In his own district-the Twenty-ninththere were insurgents gunning for him night and day. What's the use of fighting Murphy any longer with probable defeat ahead of him when he can retire to Millionaires' Row and indulge himself further in that golden silence which helped to transform him from a petty clerk in a city department to one of the millionaires of the greatest city in the country?

His Rise to Riches. Carroll's rise to riches has been won-

derful-2 commentary alike on American opportunity and American municipal politics, highly gratifying in the one instance, possibly not so much so in the other. Carroll has made politics a business and his business politics. When he came out of Manhattan College, his father's friend, Joseph J. But Carroll wasn't satisfied. He kept on going into deals with Morse, who forsook ice for banking. Carroll was made Vice-President of one of the Morse chain of banks. He got in on the ground floor in scene telephone and gas combines. He grew richer and richer. He had all the money he could need, but his ambition was to stay in politics and win the seat of the man who had made him. He went out for Croker's job as Boss of Tammany Hall. When the wave of indignation swept Richard Croker back to Wantage and put Seth Low in the City Hall, Carroll tried to ride into the place of the abdicated dictator on an anti-Croker wave of indignation. He failed. He forced Louis Nixon out, but when he fought the triumvirate of Joke." "Two Spot" and "Soort" he was beaten. He tried to do Murphy when he was elevated to the highest post of leader and falled again. He narrowly escaped defeat in his own district, and now he's out of politics. It seems most asconjshing that no one marching slowly at a respectful distance with heads bowed and uncovered as the body was taken on the Government steamer Gen. Meigs.

Robert Crawford, produced a will written and signed by the late Henry Robert Crawford drawn up, like the former one, at Nice, and of the same date. By this will the testator bequeathed to his two nephews, Henry and Robert Crawford, and to Mme. Humbert's younger sister, Mile. Marie d'Aurignac, the who e of his fortune, on condition of their paying to Mme. Frederic Humbert an annuity of \$72,000.

Thereupon the rival claimants brought the case before the courts. The law's delay dragged the affair through multi-for the side Crawford nephews, supposed to have \$40,000,000 each, yet there phantom plaintiffs and defendants have been executing wills and legal summonses, and by the alleged complicity of judicial officials have been signing and contesting legal instruments without any one being able to identify or find them.

They were legally looked for at No. 1902 Froadway, New York, but this is now found to be a furnished apartment-house, where no one of the name of Crawford ver lived, and when the domitile of the elder Crawford was sought for it was discovered that at the address steamer slowly made its way into mildstream and up the North River, to a landing near the tomb in Riverside Park, where rest the remains of the late General.
